Experience

Highradius Technology   **July 2023 – Present**
Associate Software Engineer - II   *Hyderabad, Telangana*
- Implemented Pay-by-Link process that allows the client to send the end user a payment link, which aids in quicker payment of the invoices.

Highradius Technology   **July 2022 – June 2023**
Associate Software Engineer - I   *Hyderabad, Telangana*
- Involved in developing and integrating payment transactions such are tokenization and authorization for **Credit Card, ACH, and e-Check** payment services.
- Implemented Tokenization process over the phone using **DTMF** technology that enables more than 1000+ users to add their card information securely.
- Developed reusable stateful dynamic UI components using **ReactJS, Redux, JavaScript**.
- Developed user interface to add ACH/eCheck bank account information with **GIACT** validations.
- Work independently and proactively to deliver production-ready code with minimal guidance.

Highradius Technology   **Aug 2021 – June 2022**
Software Trainee   *Bhubaneswer, Odisha*
- Served as full-stack developer, responsible for developing web applications using different web frameworks and libraries.
- Developed Employee Dashboard using **ReactJS, Redux, Redux Saga**.
- Integrated the **Redux** framework to scale and maintain the application better while handling large amounts of data.
- Designed and implemented the **RestAPI** for the UI screen where users can perform the **CRUD** functionally.

Technical Skills

Front-End: HTML, CSS, JavaScript, ES6, ReactJs, Redux, Redux Saga, Material UI, TypeScript(Basic), NextJs
Back-End: NodeJs, ExpressJs
Miscellaneous: Git, Payments, RestAPI, MySQL, MongoDB, Java

Projects

Easy Share - Online file sharing application | *ReactJs, JavaScript, Redux, NodeJs, MongoDB*   🔗
- An online application that lets users upload files up to 1000 MB, create download links, and share those links via email by providing recipient and sender email address.

Filmy - A Movie application | *ReactJs, JavaScript, TMDB API*   🔗
- Filmy is an online movie list application that shows several categories, such as top-rated, trending, and recommended movies. Additionally, it has an inbuilt search engine where you can type any type of movie name to receive additional details.

Youtube Clone | *ReactJS, Redux, Youtube API, Debouncing*   🔗
- YouTube clone that uses YouTube API to get the video lists by categories and built a search functionality that use Debouncing technique to get the response of the search query.

Food247 - A online food ordering application | *ReactJs, Redux, NodeJs, ExpressJs, MongoDB*   🔗
- An online food ordering application where users can browse any restaurant's menu and add items to their cart.
